Quality Policy

It is the main goal of the company to provide quality goods to the customer. It is the responsibility of all employees to follow strict quality procedures.

We have a full traceability system in place, which requires signatures for the work produced to be counter signed and regular quality checks are carried out during the production of all the product range.

The company will ensure full training is given. It is in the company's interest to ensure these procedures are stringently adhered to.

The system is to be assessed on a regular basis with spot checks.
